Keeping critical systems running safely & sustainably

At RSM Fuel Services, we specialise in helping organisations manage and mitigate risk in relation to their fuel infrastructure, with compliance at the forefront of everything we do.

We work in partnership with a wide range of public and private sector businesses across the UK, delivering trusted solutions that protect both operations and the environment.

Our reputation is built on expertise, care and reliability, ensuring every client receives the highest standard of support.

Our team works around the clock to provide 24/7, nationwide support, so you can be confident you're in safe hands when it comes to fuel infrastructure maintenance

Why choose RSM?

We keep the critical systems behind your business running safely, smoothly and sustainably. From tank inspections and testing to cleaning and emergency spill response, our work begins before issues arise and continues long after the job is done.

24/7 Support • Nationwide Coverage • Value Without Compromise

Our Services.
Maintenance

Keep your fuel infrastructure safe, efficient and compliant with RSM's full suite of expert maintenance services. From inspections to testing and cleaning, we help you stay ahead of issues before they disrupt your operations.

Our in-house engineers deliver expert support and clear reporting so you can make informed decisions, reduce risk and maintain peak performance across your entire fuel system.

- Spot faults early and avoid costly downtime
- Stay compliant with OFTEC and environmental standards
- Extend the lifespan of your systems and fuel

OFTEC Inspections.

Avoid costly spills, fines, and insurance issues with expert OFTEC-certified inspections. We assess your tank's condition, ensure full compliance, and safeguard your business and the environment. With RSM's qualified engineers, you get total peace of mind, reliable inspections, clear reporting, and a safer, more sustainable fuel storage system.

- Identify corrosion, leaks, or damage early
- Ensure full OFTEC regulatory compliance
- Protect your reputation and bottom line

Planned Preventative Maintenance.

Prevention is always better than the cost, risk, and disruption of a fuel system failure. Our Planned Preventative Maintenance contracts keep your infrastructure compliant, efficient, and environmentally safe all year round. With expert inspections, certified reporting and simple red-amber-green results, RSM helps you take control – protecting your operations, your reputation, and the environment.

- Catch issues early with annual fuel and tank testing
- Stay compliant with OFTEC and environmental regulations
- Reduce risk, downtime, and costly repairs

Fuel Testing Services

- Detect diesel bug, water, & sediment early
- Maintain efficiency & prevent equipment failure
- Ensure compliance with ISO and RTFO standards

Fuel Polishing

- Improves fuel quality for cleaner, efficient combustion
- Extends fuel system and fleet life
- Reduces downtime and performance issues

Tank Cleaning

- Prevents corrosion, contamination, & costly damage
- Maintains high-quality fuel for critical operations
- Improves system reliability and long-term performance

Our Services.

Testing

Fuel infrastructure failure isn't just costly – it's avoidable. Our pipework, line, pressure and non-destructive testing (NDT) services help you identify risks early and keep your system running safely and efficiently.

- Spot faults before they become failures
- Ensure compliance with OFTEC and environmental regulations
- Protect your people, assets and reputation
-

With expert inspections and precision testing, RSM gives you full visibility of your fuel system's health – so you can plan with confidence, avoid disruption, and stay fully compliant.

Pipework & Line Testing

- Identify faults before they become failures
- Meet regulatory standards with ease
- Protect people, budgets and the planet

Pressure Testing & NDT Testing

- Detect weaknesses before they lead to costly failures
- Ensure compliance with OFTEC and environmental standards
- Reduce risk of spills and operational downtime

Infrastructure

RSM's Infrastructure services are designed to build, upgrade and safely retire your fuel systems. From new pipework to compliant tank installs and removals, we deliver future-ready solutions with minimal disruption.

Tank Decommissioning

- Prevent contamination from old or corroding tanks
- Comply with EA and NRW regulations with ease
- Reduce risk and prepare your site for future use

Tank Installation

- Bespoke installation based on usage, compliance and capacity
- Minimal disruption with expert planning and execution
- Ongoing support through preventative maintenance contracts

Pipework Installation

- Full installation and upgrades for all pipework types
- In-house expertise with leading pipework brands
- Safe, compliant, and future-ready fuel systems

Our Services.

Fuel Management

Our Management services help you handle fuel responsibly – from transitioning to HVO, removing waste oil, or transporting hazardous liquids. We make every step safe & compliant.

- End-to-end HVO transition and fuel transfer
- Nationwide ADR VAC tanker services
- Safe fuel uplift and waste oil collection
- Complex fuel infrastructure automation

With expert fuel systems engineers, we have specialists in fuel management systems, pump control systems, tank gauging and electrical fault finding, all with specialist vehicles and full regulatory compliance. This gives you faster response times, improved project efficiency, greater support and enhanced technical expertise to deliver complete fuel systems solutions.

HVO Transition & Fuel Transfer

RSM makes transitioning to HVO simple, safe and fully compliant. Our confined space-trained engineers and specialist ADR VAC fleet handle everything from fuel uplift and tank cleaning to safe, efficient transfer, supporting your shift to cleaner, low-carbon alternatives with confidence.

- Expert HVO transition and tank preparation
- Confined space and non-entry tank cleaning
- Safe uplift and transfer with ADR-certified vehicles

ADR Vac Tanker Services

RSM's ADR VAC Tanker Services provide safe, compliant transport of hazardous liquid waste across the UK. Our specialist vacuum tankers are built to ADR standards, making them ideal for removing waste fuel, chemicals and industrial byproducts quickly, cleanly and responsibly.

- Fully ADR-compliant hazardous waste transport
- Ideal for fuel, chemical and industrial waste
- Safe, efficient service delivered nationwide

Fuel Uplift & Waste Oil Collection

When fuel is no longer needed or no longer usable, RSM's uplift and waste oil collection service helps you remove it safely, sustainably, and in full regulatory compliance. Our qualified engineers manage the entire process, from assessment to disposal, helping you reduce risk, free up space, and protect both your business and the environment.

- Reclaim value with potential fuel rebates
- Ensure safe, spill-free removal and disposal
- Stay compliant with environmental regulations

Fuel Spill Response

RSM's 24/7 Fuel Spill Response service gives you rapid, expert support when it matters most. Our UK Spill-accredited teams act fast to contain spills, minimise environmental impact, and protect your operations, ensuring your business stays safe, compliant, and fully operational.

- 4-hour national response target, 24/7
- Full containment, clean-up and responsible disposal
- UK Spill-accredited service for total peace of mind

Expertise you can trust.
